

The Illinois Home Performance process

Each of the three steps below must be completed by an IHP Participating Contractor. Verify your contractor is current in the program at

www.IllinoisHomePerformance.org/FindContractor

From a drafty, inefficient home to one that's safe, comfortable, & saves energy!

Assess the home's current state through an energy assessment

Improve with airsealing, insulation, furnace/duct repair *

Verify work quality and energy savings with "test out" +

* Improvements must result in either the Silver or Gold Certificate; contractor must seal air leaks prior to installing insulation

+ Program provides third-party quality assurance on a specific percentage of homes to verify each Participating Contractor's work quality
